## Equipment description

Bloc 10 allows 6 momentary switches to be interfaced with a status indicator and a backlight indicator per function.
It interfaces with a Scheiber Multibloc network, in order to retrieve the state of the control switch and to deport the control to a power block (Bloc 9 for example).

## Wiring

(1)

Connect to each connector:

- either a CAN connection cable (to another Multibloc compatible device)
- or a $120 \Omega$ impedance matching plug.

(2) Connect the equipment to the pins according to the numbering available in the table below, then plug the MPC connector into the TYCO receptacle.
