

**MOUNTING OF THE SENSOR 5 PROBES
WITH VENTILATION AND ASPIRATION PIPES**
réf. 34.11642.XX

mercredi 29 novembre 2000

The probes are in stainless steel, approved for food contact.

Level reference	Probe	Color of the wires
	1	black
1/4	2	grey
1/2	3	violet
3/4	4	brown
Full	5	blue

MOUNTING :

1. Drill a hole in the top of the tank with a saw (diameter 60mm).
2. Put the joint on the lead
3. Introduce the lead in the hole of 60mm in diameter
3. Screw in the nut by the way of the filling plug (flat face of the nut in the tank).
1. Connect the lead (see wiring)
4. Connect the pipe on the aspiration pipe
5. Fill the tank.

The sensor is ready.

We recommend you to clean the sensor all year for a perfect running.
